

**REMINDER:  
NOTICE OF POOL AND SPA SAFETY**

This notice is a reminder for our members and guests that the area adjacent to the Bermuda Greens Clubhouse, including the pool and spa, is being monitored by several cameras, which have been installed by Comcast. The purpose for the cameras is to encourage compliance with the rules, assist in investigations and as a deterrent to vandalism.

The acquisition and installation of our security system was recommended by the Collier County Sheriff's Office and was coordinated with the Bermuda Greens legal advisor. The system was installed in January along with the appropriate signage.

Past experience advises us that there may be substantial after hours usage of the pool and spa. Pool and spa rules are clearly defined by the Bermuda Greens Rules and Regulations. These rules are in accordance with the Florida statutes, which have been designed and established for the safety of owners, renters, and guests and which apply to everyone — adults and children alike.

These same rules and regulations are included in the Association's buyer/seller applications as well as our rental applications. These rules and regulations also apply to all owners, tenants and guests. In addition, owners are responsible for their tenants and guests and should ensure that they have been advised as to the rules. Violators will be subject to sanctions including fines and denied future use of common area facilities.

The Bermuda Greens Board of Directors does not take such violations lightly; they exist to promote the safety and welfare of the community. Safety, quality of life and financial investments are important to our members, which is why Bermuda Greens remains a highly established condo residence in southwest Florida.

The full set of Rules and Regulations can be found on the [BermudaGreensNaples.com](http://BermudaGreensNaples.com) website under Governing Documents and Guests and Renters.
