

Bermuda Greens Paint Project Begins Monday, January 10

As United Plastering finishes up their work making building repairs, Total Painting, our paint contractor, is ready to begin work on Bermuda Greens on Monday, January 10.

Total has completed their previous job which has allowed them to move our start date to Monday, Jan 10, ahead of schedule. We are anticipating a successful project over the next three months or so, hoping the weather works with us!

Key Points:

- Total will begin to move equipment on site today, Friday, and finish that on Monday. Their equipment will be stored on the back side of the circle between the A Building and the Bocce Court.
- Street parking restrictions have been lifted for the duration of the project. Be mindful to keep all 4 of your tires on the street and NOT on the grass so as not to damage sprinkler heads.
- Total will work on 5 buildings at a time, beginning A through E. Each group will take a couple of weeks to complete.
- They will attach Notices to your Unit if there is anything specific that you need to do to prepare.
- You will be notified when it is time for your building work to begin with any specific information as needed.

We understand and appreciate this project will require continued patience and cooperation from residents as we work to maintain our community and keep it looking beautiful!
