

## REMINDER - Be Aware of Your Surroundings

Bermuda Greens Residents,

A reminder to those who are in summer residence in BG or to your Guests that may be visiting.

We share our slice of paradise with many wild animals who may or may not be visible. We are all aware of alligators and snakes in Florida, but you should also be aware there are others like bobcats and bears. A bear was spotted on an outdoor camera at 3:50 AM casually walking down the sidewalk of E8 and strolling across the driveways. Bobcats are seen generally (not always), around dusk, and we are told by FWC they are scared off by loud sounds and motions. Bears can appear at any time.

While there may not be many people out walking in the middle of the night, you should always be aware of your surroundings no matter the time of day, especially when you are walking with small children or pets. With fewer people in residence in the summer, the animal activity seems to pick up.

So be aware, be safe and enjoy your summer!

Claire Marie England, CAM
