

Clubhouse Grill Users....

I am pleased to inform you that our grills have been thoroughly refurbished and cleaned by Pat. They now contain new interior components and are operating at optimal performance. We extend our gratitude to Pat for his dedicated efforts in maintaining the cleanliness and functionality of these grills.

Pat has also requested that I remind everyone about best practices for grilling small vegetables such as mushrooms, peppers, onions, and zucchini. These items tend to fall through the grill grates, resulting in small flare-ups that can wear down the grill components more quickly, necessitating more frequent replacements. To mitigate this risk, we recommend using a grill basket or a cast iron or all-clad frying pan when grilling these smaller items, ensuring they stay securely in place.

Your cooperation and attention to this matter would be greatly appreciated. Thank you for your understanding.

Lorrie
